

Sustainable Manufacturing Conference

14th December - IMechE, One Birdcage Walk, London

This conference is designed to help you to identify new business opportunities and to provide case studies of how companies are driving down manufacturing costs and reducing emissions

Prof Mike Gregory, Head of the Institute for Manufacturing, **Gary Punter**, Head of Engineering at British Sugar and other high profile speakers will outline the many ways in which manufacturing costs are being reduced and emissions cut to meet new environmental regulation.

Do your goods or services help manufacturing companies reduce their energy costs and cut emissions? Or do they reduce the use of materials or help save water? If so, your company could benefit from a UKTI campaign to open up new business opportunities by positioning the UK as key partner in sustainable manufacturing in China and India. UKTI Commercial Officers based in China and India will tell you about the demand to cut costs and waste in global markets.

There will be an opportunity for you to put questions to a panel of experts, to network with them and to meet UKTI and other conference partner organisations who can help your business.

To register and make payment go to:
www.sustainablemanufacturingconference.com

This full day conference with lunch and refreshments is £60 plus VAT per delegate. If you require further information or need assistance in placing your registration contact the UKTI Events Support Team on 01772 767778 or email sustainablemanufacturing@glasgows.co.uk

Programme*

Jointly chaired by **Paul Calver**, UKTI Advanced Engineering Global Value Chain Specialist for China and India and **Prof Mike Gregory**, IfM, University of Cambridge.

09.00 Registration with refreshments served and an opportunity to meet UKTI partners and network with others delegates

10.00 Welcome and introduction to the day

Keynote Address - **Guo Zhong**, First Secretary, Commercial Section, Chinese Embassy

What is Sustainable Manufacturing?

Prof Mike Gregory CBE, IfM, University of Cambridge

Gary Punter, Head of Engineering, British Sugar - A Holistic Approach to Sustainable Manufacturing

International Opportunities

New International Market Opportunities for Sustainable Manufacturing Equipment and Services - **Paul Calver**, Global Value Chain Specialist, UKTI

Chinese Plans for Clean Manufacturing and Opportunities for UK Companies

Chinese Market - Pearl River Delta - **Jacqui Mullen**, UKTI, Guangzhou Consulate, China

Discover which Energy Intensive Sectors in Indian want to reduce their Costs

Indian Market Opportunities - **Sudipto Sen**, UKTI, India

The Emergence of International Competitors in Sustainable Manufacturing

International Competition from Germany, Japan and the USA - **Dr Shahin Rahimifard**, Loughborough University

Interactive Panel Discussion

Delegates will have the opportunity to ask questions and discuss what products and services they have to offer to the Global Market, in response to the opportunities highlighted in India and China

The Benefits of Introducing Sustainable Practices which Save Money, Improve Efficiency and Boost Competitiveness in Manufacturing

Energy Efficiency, Saving Water and Reducing Waste - **Alan Hendry**, Head of Sustainability, Jacobs

Resource and Waste Recycling - **Dr Carlos Ludlow-Palafox**, Director & Chief Technology Officer, Enval

Interactive Panel Discussion

Discuss how UK businesses can realise the benefits of Sustainable Manufacturing

Access New International Business Opportunities with UKTI's Help

- How to capture the opportunities?
- What do you have to offer?
- How the UKTI can help
- Plans for missions to China and India - **Paul Calver**, Global Value Chain Specialist, UKTI

17.00 Closing Address - **Prof Mike Gregory CBE**, IfM, University of Cambridge
