FIRMS THAT START TO EXPORT EXPERIENCE, ON AVERAGE, A GREATER THAN

30 per cent

UPLIFT IN PRODUCTIVITY.

Featuring experience relevant to all areas of manufacturing, with a focus on **engineering, automotive** and **aerospace**, this is a unique opportunity to hear from UKTI's specialists, and businesses with hands-on experience in these markets. This will help you understand the scale of the market, get your specific questions answered and identify the steps that can help your company succeed where others have gone before.

- Hear direct from UK manufacturing and engineering companies doing business in these markets who have grasped the opportunity and overcome the challenges – and ask them questions.
- Learn about the scale of the opportunity from heads of the UKTI's advanced engineering commercial teams based in **Brazil, Russia, India, China** and the **USA** and meet them one-to-one to discuss your prospects and how they can help with practical tailored advice on developing business relationships in those markets.
- Understand more about key areas such as **project finance, international business law** and **IP Protection** from our expert speakers and follow up on the day during clinic sessions.
- Learn about the range of assistance available from UKTI and EEF in your region to help you take the next step to realising your exporting potential.
- Also learn about new ECGD products.

The cost to attend is just £50 +VAT per head.

EEF is supporting the participation of its members and the rate to them is £45 +VAT per head.
